KNOWLEDGEPANEL (KP) OMNIWEB

OMNIWEB using the KnowledgePanel™ is a national online omnibus service of GfK Custom Research North America. The KnowledgePanel™ is the only commercially available online probability panel in the marketplace; making the sample truly projectable to the US population, which sets it apart from traditional “opt-in” or “convenience” panels.

- To recruit panel members, we use ABS (address-based sampling) as the primary methodology -- a probability-based approach that includes cell phone-only households
- For non-Internet households, we provide Internet access and a laptop for the completion of online surveys: Therefore, the sample is not limited to only those who already have Internet access
- The representativeness of its sample -- including hard-to-reach groups such as young adults, males and minorities\ -- has been documented in numerous academic papers

The sample for each wave's KP OMNIWEB consists of 1,000 completed interviews, made up of male and female adults (in approximately equal number), all 18 years of age and over. All completed interviews are weighted to ensure accurate and reliable representation of the total population, 18 years and older.

The raw data are weighted by a custom designed computer program, which automatically develops a weighting factor for each respondent. This procedure employs several variables, including: age, sex, education, race, HH income, met/non-met status, internet status and geographic region. Each interview is assigned a single weight derived from the relationship between the actual proportion of the population with its specific combination of age, sex, education, race and geographic characteristics and the proportion in our sample that week. Tabular results show both weighted and unweighted bases for these demographic variables.

Because of the use of rigid and replicable sampling, field, and weighting procedures, all KP OMNIWEB studies are parallel to one another. This affords the opportunity to draw trend comparisons, as well as point-in-time analysis.

In addition to the standard breakdowns by sex, age, income and region, the following classification items have been obtained and are available to subscribers:

- | | |
|---------------------|---------------------------|
| ■ Marital Status | ■ Home Ownership |
| ■ Race/Ethnicity | ■ Housing type |
| ■ Employment Status | ■ Head of Household |
| ■ Education | ■ Family Size/Composition |

Optional panel profiled classification items, such as Political Party ID and Voter Registration, are available upon a request at an additional fee.

The results contained in this report are based on interviews conducted from June 6 – 8, 2014. A total of approximately 1,000 interviews were completed, with approximately 500 female adults and 500 male adults. The margin of error on weighted data is ± 3 percentage points for the full sample.

The client's questionnaire is shown on the next page, with tabular results following.

**** Tabulation note:** Please be advised that frequencies on all summary tables are percentaged off of their original bases, not necessarily off of the base shown on the summary table.

Next,

The next few questions are about how colleges and universities, including Boards of Trustees, are performing.

1. How good a job are colleges and universities, including Boards of Trustees, doing to ensure that students graduate with the skills and knowledge they need for citizenship and career? (Select only one response.)

- 1 Excellent
- 2 Good
- 3 Fair
- 4 Poor

2. How good a job are the leaders of colleges and universities, including Boards of Trustees, doing when it comes to making sure that students are exposed to a wide range of viewpoints across the ideological spectrum? (Select only one response.)

- 1 Excellent
- 2 Good
- 3 Fair
- 4 Poor

3. How good a job are leaders of colleges and universities, including Boards of Trustees, doing to make sure that higher education is worth the investment of time and money by students? (Select only one response.)

- 1 Excellent
- 2 Good
- 3 Fair
- 4 Poor

4. Please tell me whether you agree or disagree with each of the following statements: (Select only one response for each.)

	Strongly Agree	Agree	Disagree	Strongly Disagree
Colleges and universities should require all students to take basic classes in core subjects such as writing, literature, math, science, economics, U.S. history, and foreign language.	4	3	2	1
Students at college campuses are exposed to a wide range of ideological and academic viewpoints.	4	3	2	1
Colleges and universities are increasingly becoming places of intolerance and political correctness.	4	3	2	1
Boards of Trustees should not allow their institutions to yield to pressure to withdraw invitations to controversial speakers.	4	3	2	1
College is becoming financially unaffordable for the middle class.	4	3	2	1
Students do not get their money's worth in today's higher education system.	4	3	2	1
The tenure system, where teachers are guaranteed their jobs, contributes significantly to higher costs and lower education quality in American colleges and universities.	4	3	2	1
Boards of Trustees should take the lead in reforming higher education to lower costs and improve quality.	4	3	2	1
